

How to Use Dropbox to Download Templates

1. Locate the template needed.

- Our templates are sorted by the same categories as our JDS Components Catalog sections.
- Click on the category section folder that your item is located in.
- Items are listed by part number in alpha numeric order.
- Generally, there will not be templates for simple shapes (squares, circles and rectangles).

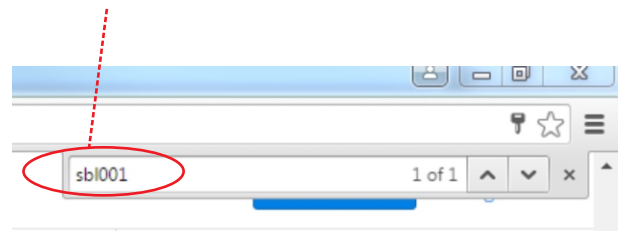

2. Search for a template using the “Find” function

• Dropbox does not have a built-in search box function, however you can search within a category folder by using your browsers “find” option. To use this option do the following.

- **PC USERS:** Press the Control key + F, type a part number.
- **MAC USERS:** Press the Command key + F, type a part number.

Note:

Search boxes vary in style and location in different browsers (Internet Explorer, Chrome, Firefox, Safari, etc.) Your search box will look similar to this one, however it may differ slightly.

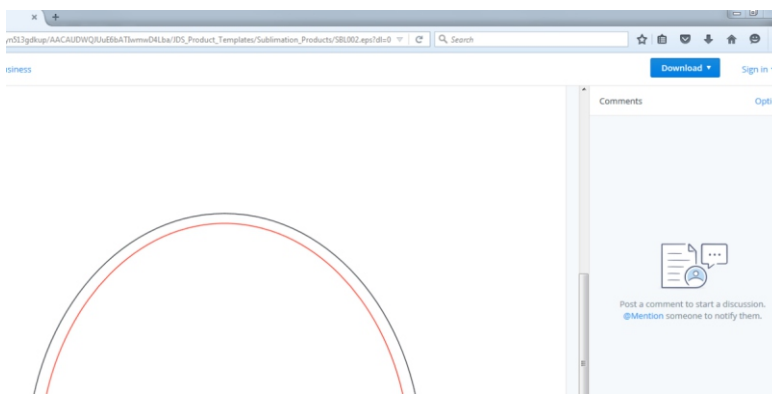

- If the part number is listed, it will automatically highlight.

SAC033.eps	339.7 KB
SAC044.eps	168.86 KB
SB205.eps	279.42 KB
SB20W.eps	279.42 KB
SBL001.eps	223.21 KB
SBL002.eps	4.66 MB
SBL003.eps	267.57 KB

3. Select the item to download

- Click on the part number needed. Some internet browsers may not show a preview. The template can still be downloaded even though a preview may not appear.

4. Download the template

- Go to the top right of the Dropbox screen and click the blue Download button then select Direct Download
- The .eps file will download which can then be imported into the design software.
